To Whom It May Concern:

Recently, ID Theft Solutions of America developed and implemented a Non-Public Information policy to protect Carolina Village personal and confidential information and minimize our risks of identity theft. We chose IDTSOA because it is a leader in identity theft protection and prevention programs for individuals and businesses in the healthcare field.

I am careful when giving recommendations regarding programs and services we are affiliated with. I am comfortable in passing along information that I feel will help area businesses and their employees. We were impressed with IDTSOA's identity theft program, which included a detailed risk assessment of each department, employee training on their responsibilities to safeguard information, help in developing and implementing a security and privacy policy, and offered to our employees to protect them and their families from identity theft and legal issues. All of these services were available at no cost to our firm.

We feel that Carolina Village is leading by example in doing our part to fight identity theft. By working with ID Theft Solutions of America and educating our employees, we have completed yet another big step in the prevention of an identity theft breach within our system. All area businesses could profit by taking a serious look at the services and benefits provided by ID Theft Solutions of America.

Sincerely,

Kevin Parries  
Executive Director
